Renault Design 2025

hello

tool box
core elements

—

mindset

In 2021, Renault embodies a new identity, that goes beyond the awareness, acquired thus far, to become an inclusive brand that embraces openness.

To deploy it accurately and consistently on our digital ecosystem, make sure you follow those 5 simple guidances:

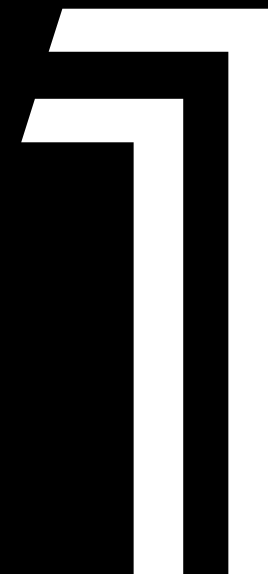

ICONICITY, by showcasing our new emblem alone (without the Renault wordmark), by dressing our pages in a reduced panel of colours, and by building simple yet impactful displays

MODERNITY, with simple signs and sober layouts, without superfluous effects or colours, and by proposing an obvious, easier, user-friendly experience

COMPLEMENTARITY, by always finding the good balance between brand and products, pictures and texts

MOTION, by favouring simple and light animations and effects, and by easing the navigation

CREATION OF VALUE, by engaging and interacting every day with our audiences, and thus making, more than ever, our digital touchpoints the preferred interface between Renault and its customers

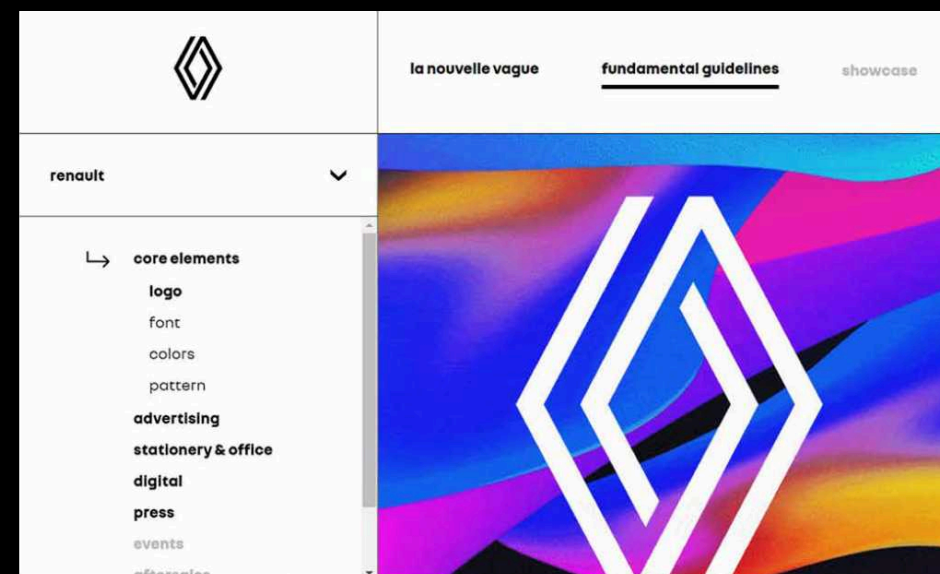

toolbox

You'll find all useful material and tokens on two dedicated platforms:

Brand-Hub : core elements
brand.renault.com

 **toolbox**

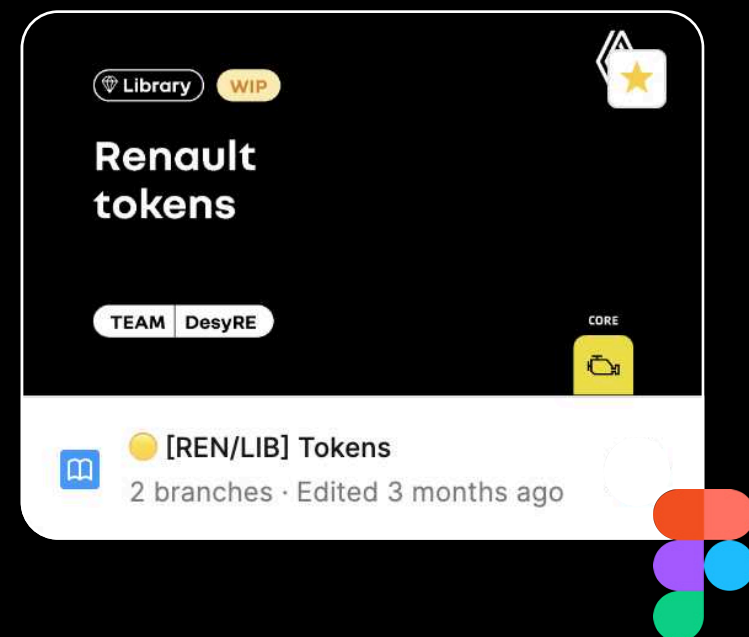

design system

If you are working on Figma files,
active the Renault Design System library
to use all the token system on
your projects : colors, typo, spacing, etc.

core elements

—

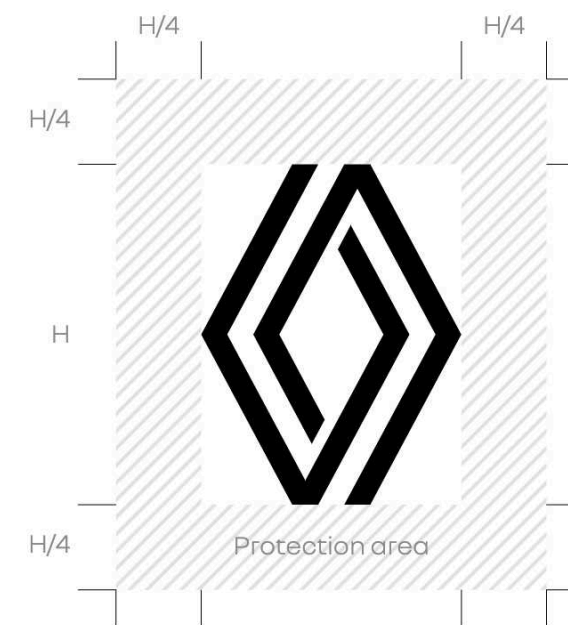

Our new emblem **lives now by itself:**
except for some specific cases,
it doesn't need its Renault mention
anymore.

emblem

 core elements

Mini 40 px  (except favicon: 32 px)

Our palette consists of three main values: the white, the black and its grey gradients, and our iconic yellow. Make sure you follow the global proportions illustrated opposite.

primary : first color hierachy

secondary : brand color
accent

tertiary : variant color

neutral : grayscale color

surface : background

primary black

A creative typeface designed and developed in several alphabets for our exclusive use, **the nouvel'R fonts collection provides a strong visual footprint for the brand.**

You can use this font for your main communication purposes: titles, sub-titles or key messages.

Bold and Regular are the most used in digital project.

Roles are defined according to a standard definition of **text usages in digital interfaces**, with standard role names making them easy to understand for developers and designers.

Display, Headline and Title are all titles, but with a different hierarchy: Display > Headline > Title.

Body, Label and Legal are both secondary texts: These usages are defined to make them manageable separately with different line-height and sizes.

role usages

DISPLAY

Widest font-sizes of title texts.
Usually use for marketing content for immersive storytelling.

HEADLINE

Font-sizes for title texts.
Usually use for sections on page interface.

TITLE

Smallest font-sizes of title texts.
Usually use on smaller components like cards or as strapline.

BODY

Default descriptive text like paragraphs.
Readability of this text usage should be on optimal value.

LABEL

Short text for interaction purpose like CTAs, radio buttons, input forms etc.

LEGAL

Smallest text used on mandatory legal captions.

For your text blocks, make sure you follow the simple rules illustrated opposite.

Use **lower-case text** for titles (Display, Headline, Title) and Labels. Sentences with punctuation are not affected by this rule (Body, Legal).

formatting rules

core elements

title

headline desktop

introduction

Body text here : Lorem ipsum dolor sit amet, consectetur adipiscing elit. Vivamus nulla est, finibus consequat cursus eu.

strapline

headline mobile

introduction

Body text here : Lorem ipsum dolor sit amet, consectetur adipiscing elit. Vivamus nulla est, finibus consequat cursus eu.

By using our **Design System**,
Each role's size have a defined responsive
value in pixels in each breakpoint :
mobile, tablet, desktop and widescreen.

Find out all the font-sizes values on the
Design System guidelines (Figma)

mobile
80 px

Using the **rem values** instead of pixel values enables font-sizes to be scaled on the web browser to comply with **accessibility** standards when resizing web page content.

Find out all the rem values on the Design System guidelines (Figma)

scaling on web browser

 core elements

base
1 rem = 16 pixels

Also designed for our exclusive use, the now familiar **read fonts collection** comes as an alternative for specific usaged and.or modules, when the nouvel'R is not available.

Please note that for specific purposes (office, CRM, Newsletters...), when none of our creative typefaces are available, you can use by default the Arial.
